Mission Statement Gesundheit Österreich GmbH

OUR MISSION

Health is our expertise.

As the Austrian National Public Health Institute (GÖG), we contribute to shaping and advancing the development of our national healthcare system.

We provide scientific analysis and evidence-based insights to support informed decision-making.

Through our collaborations, we strengthen professional cooperation and promote meaningful dialogue between the public, social and health sectors, academia, administration, and policymakers, in support of an effective, solidarity-based, and sustainable healthcare system.

OUR VISION

**We envision a society
in which everyone can
enjoy a high quality of
life in good health.**

We are committed to a forward-looking,
inclusive and empowering healthcare system.

This ensures equitable access to care, health
promotion, prevention, rehabilitation, and
support to all.

As a national public health institute, GÖG
plays a key role in shaping this future.

OUR VALUES

**Responsibility,
Integrity,
Independence**

Responsibility

We shape the healthcare system in a participatory and community-oriented way.

We foster respectful cooperation.

We embed social, environmental, and economic sustainability in our work.

Integrity

We act reliably and build trust.

We view diversity as a strength, both within the population and within our own team.

We promote a culture of openness, learning, and continuous development.

Independence

We work in a scientifically independent, evidence-based, and impact-oriented manner.

We carry out our work using quality-assured, recognised, and reproducible methods.

We continuously develop and refine our approaches.
